DuPont[™] SUVA[®] 134a Auto

Version 2.3

Revision Date 09/12/2011

Ref. 130000024024

This SDS adheres to the standards and regulatory requirements of the United States and may not meet the regulatory requirements in other countries.

SECTION 1. PRODUCT AND COMPANY IDENTIFICATION

Product name Tradename/Synonym	:	DuPont [™] SUVA [®] 134a Auto SUVA [®] 134a Auto HFC 134a
MSDS Number	:	13000024024
Product Use	:	Refrigerant
Manufacturer	:	DuPont 1007 Market Street Wilmington, DE 19898
Product Information Medical Emergency Transport Emergency	:	1-800-441-7515 (outside the U.S. 1-302-774-1000) 1-800-441-3637 (outside the U.S. 1-302-774-1139) CHEMTREC: 1-800-424-9300 (outside the U.S. 1-703-527-3887)

SECTION 2. HAZARDS IDENTIFICATION

Emergency Overview Rapid evaporation of the liquid may cause frostbite.

 Potential Health Effects

 Skin

 1,1,1,2

 Tetrafluoroethane

 Eyes

 1,1,1,2

 Tetrafluoroethane

 Eyes

 1,1,1,2

 Tetrafluoroethane

 Eyes

 Tetrafluoroethane

 Eyes

 1,1,1,2

 Tetrafluoroethane

 :
 Contact with liquid or refrigerated gas can cause cold burns and frostbite.

 May cause eye irritation.

 May cause eye irritation.

 May cause: tearing, Redness, Discomfort.

Revision Date 09/12/2011

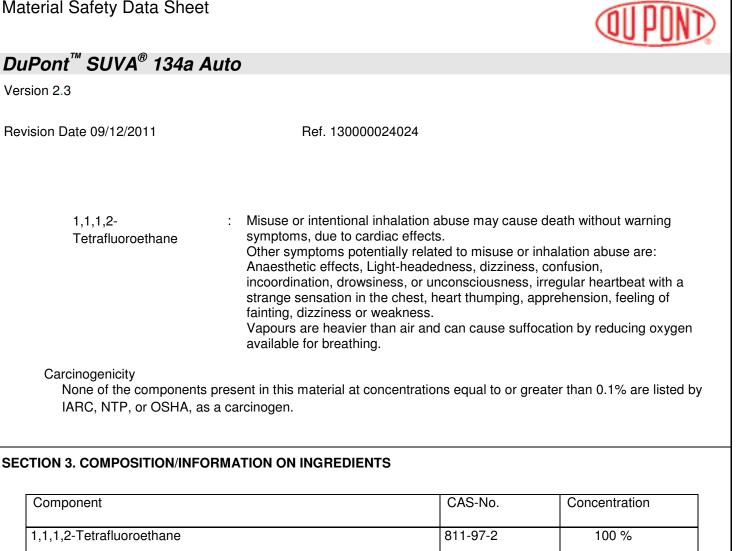

1,1,1,2-

Carcinogenicity

Component

Tetrafluoroethane

Version 2.3

1,1,1,2-Tetrafluoroethane

-		-	
	Skin contact	:	In case of contact, immediately flush skin with plenty of water for at least 15 minutes. Take off all contaminated clothing immediately. Consult a physician. Wash contaminated clothing before re-use. Treat for frostbite if necessary by gently warming affected area.
	Eye contact	:	In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Consult a physician if necessary.
	Inhalation	:	Remove from exposure, lie down. Move to fresh air. Keep patient warm and at rest. Artificial respiration and/or oxygen may be necessary. Consult a physician.
	Ingestion	:	Is not considered a potential route of exposure.
			2/10

DuPont[™] SUVA[®] 134a Auto

Version 2.3

Revision Date 09/12/2011	Ref. 130000024024
General advice	: Never give anything by mouth to an unconscious person. When symptoms persist or in all cases of doubt seek medical advice.
Notes to physician	: Because of possible disturbances of cardiac rhythm, catecholamine drugs, such as epinephrine, that may be used in situations of emergency life support should be used with special caution.
SECTION 5. FIREFIGHTING ME	ASURES
Flammable Properties Flash point	: does not flash
Lower explosion limit	: Method : None per ASTM E681
Upper explosion limit	: Method : None per ASTM E681
Fire and Explosion Hazard	 hazardous thermal decomposition products: Carbon oxides Hydrogen fluoride Oinders are equipped with pressure and temperature relief devices, but may still rupture under fire conditions. Decomposition may occur. Contact of welding or soldering torch flame with high concentrations of refrigerant can result in visible changes in the size and colour of the torch flame. This flame effect will only occur in concentrations of product well above the recommended exposure limit. Therefore stop all work and ventilate to disperse refrigerant vapors from the work area before using any open flames.

OUPOND

DuPont[™] SUVA[®] 134a Auto

Version 2.3

Revision Date 09/12/2011

Ref. 130000024024

HFC-134a is not flammable in air at temperatures up to 100 deg. C (212 deg. F) at atmospheric pressure. However, mixtures of HFC-134a with high concentrations of air at elevated pressure and/or temperature can become combustible in the presence of an ignition source. HFC-134a can also become combustible in an oxygen enriched environment (oxygen concentrations greater than that in air). Whether a mixture containing HFC-134a and air, or HFC-134a in an oxygen enriched atmosphere become combustible depends on the inter-relationship of 1) the temperature 2) the pressure, and 3) the proportion of oxygen in the mixture. In general, HFC-134a should not be allowed to exist with air above atmospheric pressure or at high temperatures; or in an oxygen enriched environment. For example HFC-134a should NOT be mixed with air under pressure for leak testing or other purposes. Experimental data have also been reported which indicate combustibility of this substance in the presence of certain concentrations of chlorine. : In the event of fire, wear self-contained breathing apparatus. **Firefighting Instructions** Use extinguishing measures that are appropriate to local circumstances and the surrounding environment. Cool containers / tanks with water spray.

SECTION 6. ACCIDENTAL RELEASE MEASURES

NOTE: Review FIRE FIGHTING MEASURES and HANDLING (PERSONNEL) sections before proceeding with cleanup. Use appropriate PERSONAL PROTECTIVE EQUIPMENT during clean-up.

Water runoff should be contained and neutralized prior to release.

Safeguards (Personnel)	:	Evacuate personnel to safe areas. Ventilate area, especially low or enclosed places where heavy vapours might collect.
Accidental Release Measures	:	Should not be released into the environment. Self-contained breathing apparatus (SCBA) is required if a large release occurs. Avoid open flames and high temperatures.

SECTION 7. HANDLING AND STORAGE

Handling (Personnel)

: Use sufficient ventilation to keep employee exposure below recommended limits. For personal protection see section 8.

QUPOND

DuPont[™] SUVA[®] 134a Auto

Version 2.3			
Revision Date 09/12/2011	Ref. 13000024024		
Handling (Physical Aspects)	: The product should not be mixed with air for leak testing or used with air for any other purpose above atmospheric pressure. Contact with chlorine or other strong oxidizing agents should also be avoided.		
Storage	 Valve protection caps and valve outlet threaded plugs must remain in place unless container is secured with valve outlet piped to use point. Do not drag, slide or roll cylinders. Use a suitable hand truck for cylinder movement. Use a pressure reducing regulator when connecting cylinder to lower pressure (>3000 psig) piping or systems. Never attempt to lift cylinder by its cap. Use a check valve or trap in the discharge line to prevent hazardous back flow into the cylinder. Cylinders should be stored upright and firmly secured to prevent falling or being knocked over. Separate full containers from empty containers. Keep at temperature not exceeding 52°C. Do not store near combustible materials. Avoid area where salt or other corrosive materials are present. 		
Storage temperature	: <52 ℃ (<126 ℉)		
SECTION 8. EXPOSURE CONTR	OLS/PERSONAL PROTECTION		
Engineering controls	: Normal ventilation for standard manufacturing procedures is generally adequate. Local exhaust should be used when large amounts are released. Mechanical ventilation should be used in low or enclosed places. Refrigerant concentration monitors may be necessary to determine vapour concentrations in work areas prior to use of torches or other open flames, or if employees are entering enclosed areas.		
Personal protective equipment Respiratory protection	: For rescue and maintenance work in storage tanks use self-contained breathing apparatus. Vapours are heavier than air and can cause suffocation by reducing oxygen available for breathing.		
Hand protection	: Additional protection: Impervious gloves		
Eye protection	: Wear coverall chemical splash goggles.		
Exposure Guidelines Exposure Limit Values 1,1,1,2-Tetrafluoroethane AEL *	(DUPONT) 1,000 ppm 8 & 12 hr. TWA

* AEL is DuPont's Acceptable Exposure Limit. Where governmentally imposed occupational exposure limits which are lower than the AEL are in effect, such limits shall take precedence.

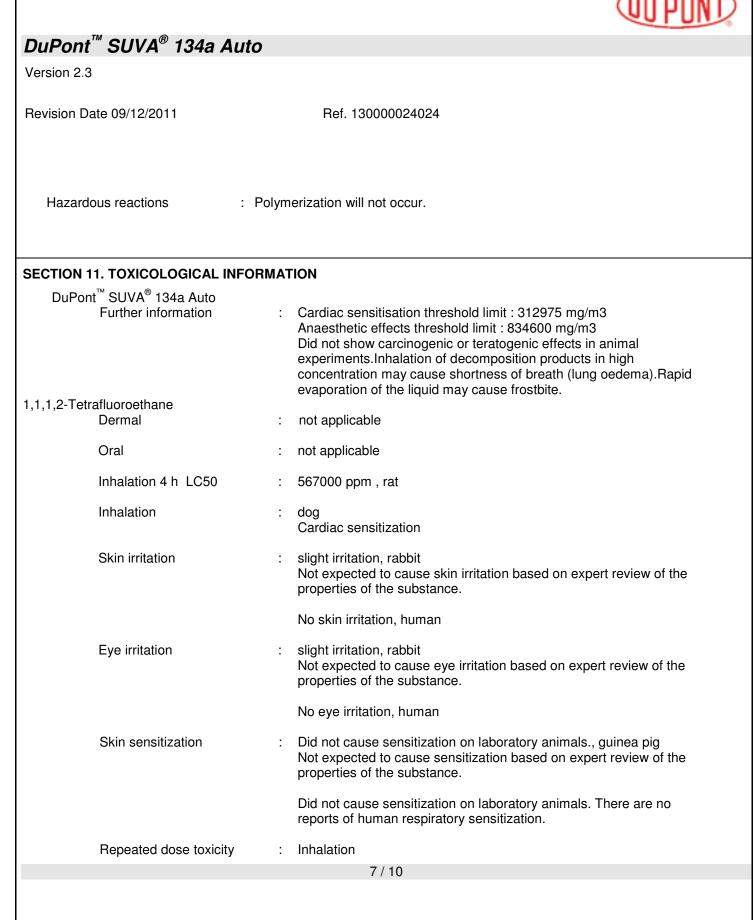

SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES

Form	: Liquefied gas
Color	: colourless
Odor	: slight, ether-like
Boiling point/boiling range	: -26.5 ℃ (-15.7 ℉) at 1,013 hPa
% Volatile	: 100 %
Vapour Pressure	: 6,661 hPa at 25 ℃ (77 ℉)
	: 13,190 hPa at 50 ℃ (122 °F)
Density	: 1.206 g/cm3 at 25 ℃ (77 ℉)
	(as liquid)
Density	: 0.0042 g/cm3 at 25 ℃ (77 ℉) at (1,013 hPa)
Density	: 0.0053 g/cm3 at -26.1 °C (-15.0 °F) at (1,013 hPa)
Specific gravity	: 1.208 at 25 ℃ (77 ℉)
Water solubility	: 1.5 g/l at 25 ℃ (77 ℉) at 1,013 hPa
Vapour density	: 3.6 at 25 ℃ (77 ℉)
	(Air = 1.0)
Evaporation rate	: >1
	(CCL4=1.0)

SECTION 10. STABILITY AND REACTIVITY

Conditions to avoid	: Avoid open flames and high temperatures.
Incompatibility	: Incompatible products Alkali metals Alkaline earth metals, Powdered metals, Powdered metal salts
Hazardous decomposition products	 Decomposition products are hazardous., This material can be decomposed by high temperatures (open flames, glowing metal surfaces, etc.) forming hydrofluoric acid and possibly carbonyl fluoride. These materials are toxic and irritating., Avoid contact with decomposition products
